Abstract

The introduction of clean government culture into the campus and the development of clean government education among students are the deepening and innovation of our party's anti-corruption work, a new way to control corruption from the source, a need to comprehensively govern the Party with strict discipline, which is conducive to the construction of healthy and harmonious campus culture, the promotion of all-round development of students, and the cultivation of high-quality talents. College students' honesty education developing in recent years, remarkable achievements, but the students, teachers and the school level in knowledge, attitude and some problems to carry out the quality, to improve the effect of honesty education needs to work from a sound network, mix, strengthen the ethics strengthen construction, improve teachers' comprehensive quality, pays special attention to the "three into", encourage college students' honesty education to develop in the direction of systematic, strive to improve the effect of honesty education and targeted.

Keywords

College students clean education;significance; problem ;countermeasures.

1. Introduction

It is an important part of anti-corruption education for the whole society, and an inevitable requirement to strengthen ideological and moral education for young people. The contemporary society is undergoing profound changes, and all kinds of temptations are pouring in. College students do not live in a vacuum. Whether they enter the society and work honestly is related to the success or failure of the Party and the country. College students' honesty education is equivalent to the professional ethics of pre-service education, both in the guide students to establish serve country, serve people's belief, improve college students' moral self-discipline consciousness, enhance the good psychological quality, enhance gradually formed clean-fingered self-discipline, wuxi professional idea, it is a forward-looking, to standardize the behavior of college students' future career education practice.

2. The significance of honesty education for college students

College students are the future of the motherland and the hope of the nation. Whether we can train a team of high-quality college students with high moral character, good moral cultivation, rich cultural knowledge, good physical and mental health, and strong skills and abilities is related to the future and destiny of the country and the success or failure of the socialist cause. To carry out anti-corruption education among college students is the spirit of implementing relevant documents of the CPC Central Committee and the practical need for us to train qualified builders and successors of the socialist cause. At the same time, it is also an inevitable trend to strengthen the construction of party conduct and clean government in the new era and realize the comprehensive and strict governance of the Party.

(1) Promote the all-round development of students, cast the need of high-quality talents.

The all-round development of people is to decompose the basic quality of people into many elements, that is, to cultivate the all-round development of educatees in virtue, intelligence, physique, beauty and other aspects. Ideological and moral quality is the core and soul of human beings, which has guiding and driving effect on the development of other aspects of human beings' quality and lays the foundation for the improvement of human beings' overall quality. Honesty is an important aspect of college students' ideological and moral quality. Therefore, honesty education among college students can help them understand the nature of corruption, resist the erosion of corruption, establish a correct world outlook, outlook on life and values, and prevent the wrong "first button of life". To enable college students to understand and feel the truth, goodness and beauty of life, experience rich and healthy spiritual life.

(2) Conducive to the construction of a healthy and harmonious campus culture.

Colleges and universities are places to cultivate talents. As the cradle and spiritual home of college students, they shoulder the important responsibility of carrying out ideological and moral education for students. Healthy and harmonious campus culture is an important software for schools to cultivate students. Under the influence of multiculturalism, some non-mainstream cultures and subcultures exist in colleges and universities at present, which is also a severe challenge to the ideological and political education of college students. Therefore, a systematic clean education is very necessary. To maximum extent, to eliminate fraud, cheating in the exam, student cadre assessment table first, gift-giving, resume fraud, homework copy, loan defaults, such as academic corruption is not clean and dishonest phenomenon, is a good way to pure relationship between teachers and students, and classmates, building a good academic ecological environment and health of human relationship, build a harmonious campus, to build a harmonious society, realizing the four comprehensive universities due contribution.

(3) To promote clean government and comprehensively govern the Party with strict discipline. Today's students are the builders and successors of the future country, and their ideology and values have a direct impact on their future behavior patterns. Most of college students at 18 to 22 years old, university stage is the key to their outlook on life, world outlook, the values formation period, strong plasticity, at this stage is also vulnerable to all sorts of bad behavior and bad thoughts on social impact and erosion, seize the key education on college students' honesty, as vaccination "anti-corrosion vaccine" ahead of schedule, build defenses, improve college students' moral self-discipline consciousness, enhance the good psychological quality, enhance gradually formed clean-fingered self-discipline, wuxi professional idea, for the future into the community can withstand the temptation of power, money and all kinds of decadent ideas lay the foundation.

3. Problems existing in college students' probity education

(1) Students' level.

First. Ordinary students do not know enough, do not understand the culture of clean government into the university and their own relationship. In their eyes, clean government is the business of leading cadres and officialdom. They are just students and far away from themselves. Do not understand the culture of clean government into the university of their own actual effectiveness, how many problems can be solved. Second. The phenomenon of using power for personal gain exists among student cadres. The survey shows that 30 percent of students believe that student cadres use their power to seek personal gain, control the award judgment, invite votes for dinner, and embezzle sponsorship money. There is a phenomenon of students giving gifts to teachers for personal benefit. Third. College students believe that the main causes of corruption are highly centralized management, imperfect system and human greed. Their attitude towards corruption is clear and full of sense of justice. However, less than

50 percent of the students are willing to report corruption. Most of the students are not motivated enough to report corruption, and they do not have a strong sense of responsibility to take practical actions to curb and combat corruption. A small number of students believe that the so-called hidden rules and practices in the society are unavoidable. They oppose and hate the corrupt behaviors in the society, but at the same time they acquiesce and tolerate these unhealthy phenomena.

(2) Teachers' level

First. It is generally believed that the duty of teachers is to impart knowledge and solve doubts, and they have no autonomy in recruitment, right to review academic papers, and no risk of corruption. Corruption and integrity mainly occur in the management personnel and leading cadres who are involved in human resources and property. As for honesty education, it should be promoted among leading cadres with great publicity. Honesty education is the work of school leading cadres, the work of the Party Committee and the Commission for Discipline Inspection, and has nothing to do with itself. Second. Separate teaching from educating. I think it is my essential work to do well in teaching and scientific research. As for students' ideological and moral education, political theory study, honest education and so on are professional counselors' affairs, and has nothing to do with themselves. Third. A very small number of teachers relax their theoretical learning and requirements, and are eager for quick success and instant benefits in order to evaluate professional titles and promote themselves, resulting in academic corruption. There are even misguided ideas about anti-corruption pessimism. So they think in ideology that the culture of clean government into colleges and universities is just formalism, singing a high profile, go through the motions, and has nothing to do with.

(3) School level

First. Insufficient attention, lack of initiative, and difficulty in innovation in working methods, namely, setting up a leading group, holding several mobilization meetings, doing a good job in several theme promotion activities, holding several expert lectures, etc. Notice, a lot of "task-style", "cutscene" to do, lack of initiative to build a clean education innovative development mechanism and long-term mechanism of consciousness, there is a "passive" and "marginal" phenomenon. Second. It is divorced from reality and lacks pertinence. And college students' honesty education in terms of content and form of real life and the thought condition, not combined with college students' daily life and learning, combining with class activities and practice, combined with the students' future career orientation, to actively develop clean education resources, poor pertinence, not for professional classify, targeted design content, existing "one-pot" chaos. Third. Deal with them piecemeal and lack of system. Is the college students' honesty education as a periodic task, periodically do some cultural activities or mechanical does some teaching arrangements, lack of overall planning, AD hoc, to take on more in class, listen to the report, look at the video, learn the file such as education, tend to have "demanded more, less supervise; More theory is instilled, less time is involved; More passive education, less active play" phenomenon. Clean education involves the cooperation of different departments of the school. However, due to the system and other reasons, the departments have not formed the overall awareness of clean education and lack of comprehensive and long-term planning.

4. Countermeasures to strengthen the honesty education of college Students

(1) Perfect work network, form resultant force

Universities should build up a set of the unified leadership of party committees, party and government should, in discipline inspection department, student education management departments and related teaching unit of leadership system and working mechanism, and

established corresponding rules and regulations system, clear responsibilities, ensure each unit of human, financial and investment, form the college students' honesty education should good situation. At the same time, colleges and universities to attach importance to the construction of campus fence outside clean work system, practical and integrated education of school, family and society together, to make schools, families, and society to form a organic coordination of overall education, form the interaction of resource integration system, scientific and comprehensive educational organization system and operation system, make the potential resources into reality of resources, and produce linkage effect, make the school education were extended, supplement, and expand.

(2) Strengthen the construction of teachers' morality and style, and improve the comprehensive quality of teachers.

Teachers should be the model of clean behavior and the preacher of clean education, so to improve the quality of educators and strengthen the construction of teachers' moral style is an important guarantee for the clean education of college students. Revision issued by Ministry of Education of colleges and universities to seriously implement the "high school teachers' professional ethics, and guide teachers to establish strong dedication and sense of responsibility, continuous improvement and innovation of teacher's ethics construction methods, contents, forms and means, put the honesty education runs through every link of the strengthen construction of the moral standards, improve teachers' professional moral cultivation and clean-fingered self-discipline consciousness, cultivate a have firm political position, profound strategic vision and broad cultural knowledge, noble professionalism and quality work ability the integrity of teachers.

(3) Focus on "three integration" to promote the systematic development of honesty education for college students

First. Integrate integrity education into classroom teaching. Want to use marxist scientific theory, especially the system of social theory with Chinese characteristics and xi general secretary series speech spirit college students' mind, make students analyzing the connotation and essence of non-corrupt and thinking, cogent accomplish positive guidance, the reverse warning, guide students to cultivate integrity concept, strengthen the psychological quality of combating, set up correct world outlook, the outlook on life, values, provided a theoretical basis for style construction and halal integrity. In the course of teaching, innovative teaching methods include not only theoretical presentation, but also case analysis and thematic discussion. Both experts and scholars counseling lectures, but also the exchange of students' ideas and wisdom of the collision. It is necessary to combine reality, get close to life, improve the appeal of clean education, and ensure that clean education truly enters the mind. In professional courses, teachers should fully explore the resources of clean government education, so that students can receive honesty education in the process of learning professional knowledge and enhancing professional skills, and form the professional concept of dedication, integrity and self-discipline and good sense of work style.

Second. Integrate probity education into social practice. If the combination of college students "three to the countryside", four into the community, professional practice, practice investigation, work-study, employment activities for education.

Third. Integrate integrity education into campus culture. Students can be actively involved in the soft inculcation of probity education through a popular activity carrier. Such as clean story meeting, warning film, clean sketch competition, debate competition, advertising competition, knowledge competition and other forms, so that college students in the experience of art, cultural edification at the same time get a subtle edification of clean culture.
